EXPERIENCE

Full Stack Developer (Web & Mobile)

Self-Employed (Freelance) - Jan. 2023 – Present

- Architected and shipped 9+ production-grade applications leveraging Next.js, React, and TypeScript.
- Engineered backend services and REST APIs with Node.js and Express.js, while designing schema-driven features using MongoDB and PostgreSQL.
- Integrated third-party services including Stripe for payments, Clerk for secure authentication, and Cal.com for scheduling.
- Optimized application performance by implementing Redis write-through caching, reducing page load times by 77% (3s to 700ms).
- Developed AI-powered features utilizing the Vercel AI SDK and Gemini API, including dynamic UI generation and server-side PDF compilation on AWS EC2.
- Built and maintained comprehensive E2E test suites using Cypress to ensure reliability across critical application paths.

PROJECTS

AI Resume Tailor

AI-powered SaaS using Gemini 2.5 Flash and Vercel AI SDK to tailor resumes to specific job descriptions, featuring a full LaTeX PDF pipeline compiled on AWS EC2 with Redis caching for performance.

Technologies: Next.js, TypeScript, Vercel AI SDK, Gemini API, Redis, MongoDB, AWS EC2

AI Appointment Booking Agent

Conversational AI agent that autonomously handles scheduling via Cal.com API, utilizing MongoDB for conversation state management and generative UI for dynamic interaction.

Technologies: Next.js, TypeScript, Vercel AI SDK, Cal.com API, MongoDB

NextGram

Full-stack social platform featuring image sharing and real-time interactions, utilizing Redis to reduce feed load times by 77%.

Technologies: Next.js, TypeScript, MongoDB, Redis, JWT

Casa Store

Unified commerce platform with a Next.js web storefront and React Native companion app sharing a common Shopify GraphQL backend.

Technologies: Next.js, React Native, TypeScript, GraphQL, MongoDB

Notes App Backend

Secure RESTful API implementation for notes management with JWT-based authentication and password hashing.

Technologies: Node.js, Express.js, MongoDB, JWT
